<p align="center"><u>Q-CODE Q47B QUALITY REQUIREMENTS FOR EXPORT CONTROLLED CONFORMAL COATED PRODUCTS</u></p>
--

The following are the quality requirements for product purchased under Q-code Q47B. This includes but is not limited to granting the right of access to the supplier's facilities and all applicable records to Plexus, their customers products and regulatory authorities with the acceptance of this Purchase Order, the flow down all applicable requirements to sub-tier suppliers including key characteristics and retention of all records for a minimum of 12 years that support the manufacturing or material per the requirements of this Plexus customer. Unless a written waiver is received from Plexus, the supplier agrees to abide by the quality requirements listed below for Acceptance of Conformal Coated Products.

Shipments and handling of Export Controlled Items, Data, or Services

The Supplier agrees to comply with The Arms Export Control Act, 22 U.S.C 2751-2794, the International Traffic in Arms Regulation (ITAR), 22 C. F. R. 120 - 130, the Export Administration Act, 50 U.S.C. app 2401-2420, and the Export Administration Regulations, 15 C.F.R. 730-774 for this product, all specifications, and associated documentation. This includes, but is not limited to:

- 1) Export controlled items, data, or services, or any element thereof, will not be exported from the United States without U.S. Government authority and the express written authorization of a Plexus ITAR Empowered Official.
- 2) Export controlled items, data, or any element thereof, will not be transferred or disclosed to foreign persons including transfer to foreign persons employed by or associated with, under contract to Sub-tier suppliers including transportation carriers.
- 3) Import Licenses will be provided with all shipments where applicable.

The required quality records and documentation must be submitted with each shipment. Shipments received without the completion and proper execution of these Quality Requirements is considered non-conforming and Plexus reserves the right to return to the supplier at the supplier's expense.

A) First Article Inspection Requirement - Supplier will execute the Aerospace First Article Inspection requirements of the SAE standard, AS9102 and provide the results to Plexus with each shipment in which the requirement is to be executed.

- 1) All recorded measurements shall include unit of measure, inches is preferred.
- 2) Must include One Coupon physically provided with shipment.

- 3) Must include Coupon Thickness Measurement/Drop Gauge Report for each side conformal coating is applied.
- 4) Tooling/Equipment Calibration Certificates - Must include copies of the actual calibration certificates of the tooling/equipment used as referenced in Column 10 of Form 3.

B) Materials Certificates - The material certification must include a statement declaring that the items are processed from the material specified and that all raw materials used conform to all applicable PO and drawing specifications and are traceable to test reports at the point of manufacturing. Included with each shipment the reports of the raw materials used in fabrication that provide direct traceability to the raw stock of the chemical compositions and physical properties for every PO and Lot Number of finished part.

C) Certificate of Compliance - Must include a statement of overall compliance to all the applicable specifications (statement is not required to list, but shall cover all the applicable specifications such as: drawing, PO, customer specifications, Plexus G9000-3, IPC Specification, etc.). CoC must also include for traceability:

- 1) Name of Supplier (if different than the actual Manufacturer/OEM/OCM).
- 2) Name of Manufacturer/OEM/OCM.
- 3) Manufacturer's/OEM's/OCM's Part Number.
- 4) The Manufacturer/OEM/OCM Lot Number. Each shipment, COC and packing slip must contain only one lot number.
- 5) Location or place of manufacture.
- 6) For the product/part with a shelf life, the manufacturer or cure date, batch number, the shelf life and expiration date must be included (note: the remaining shelf life must be greater than 80% of the stated shelf life). Any special handling and/or storage requirements must also be included.
- 7) Plexus part number and Plexus purchase order number.
- 8) All recorded measurements must include unit of measure, inches is preferred.
- 9) EC level or Revision level as specified on the PO for the Plexus Part Number ordered.

D) Packaging and Labeling - In addition to all other requirements listed, all required documentation, labels, packaging and packing slips must have Plexus part number, EC level or Revision, quantity and PO number listed on them.

Subsequent Shipments - The documentation and quality requirements for all subsequent shipments will be as follows:

A) First Article Inspection Requirement - Supplier will execute First Production Run requirements and provide the results to Plexus with each shipment following any subsequent change that invalidates the previous First Article Inspection result per AS9102. In addition, products/parts held in inventory by the supplier for 2 or more

ears or not received by Plexus in 2 or more years must have the First Production Run Requirements performed to assure no revision change or product/part deterioration during storage.

B) **Materials Certificates** - Same as B above.

C) **Certificate of Compliance** - Same as C above and the following:

D) **Labeling and Packaging** - Same as D above.

When the revision of the product/part changes, First Production Run requirements must be completed as a new part before the shipment of product/part to Plexus.

Document Retention - Supplier shall retain their quality records for 12 years.

Product change notification - Upon acceptance of conforming product, documentation, and the requirements of this Q-code, the supplier's manufacturing process shall be considered "qualified". All changes require written approval from Plexus prior to implementation. Product or Process change notification requests (PCNs) shall be submitted to pcns@plexus.com.
