

# Make a difference. Drive change. Help create products for a better world.

Plexus is an agile, forward-thinking company of problem solvers who bring complex technologies and innovative products to life. We are engineering, manufacturing and supply chain experts passionate about building a better world for the people who will benefit from what we do.

We help our customers realize their most visionary ideas, and we want you to be a part of it.

## DESIGN AND DEVELOPMENT

A problem solver through and through. Consistently providing creative engineering solutions. We are looking for innovators - from a broad range of engineering disciplines to project management. No matter the role, you will work across a global team to find answers to the most complex engineering challenges.

## SUPPLY CHAIN SOLUTIONS

Embracing supply chain complexity. Eliminating risk. Delivering a customized approach. As a member of the supply chain organization, you will partner with our customers to identify a flexible, scalable offering, from global sourcing and supplier relations, to procurement, logistics and counterfeit parts prevention.

## NEW PRODUCT INTRODUCTION

Getting it right the first time. Through an integrated, global project team, find your place in design verification, test engineering, rapid prototyping and transition management. Each area is equipped to quickly move through engineering and manufacturing a customer's product to market on time without compromising quality.

## MANUFACTURING

An extension of our customer's teams. Focused on innovation, continuous improvement and tailored services. Our manufacturing solutions offer a wide range of opportunities focused on earning our customer's trust through understanding the importance of their product and meeting their needs, with 100% quality, every time.

## AFTERMARKET SERVICES

Impact a product long after its sale. Support and protect the loyalty of a customer's brand. From upgrades to warranty management and everything in between, you will collaborate across all Plexus service offerings to manage and extend a customer's product lifecycle.

## Our Values and How We Lead

We are dedicated to our internal and external customers through collaborative, highly valued relationships. There's an energy and drive in all aspects of our work. Ideas are brought to life through open, transparent communication channels while maintaining the highest standard of ethics and respect for the products we create and the people we partner with.

### Our Values

Customer Focus

Relationships  
and Teamwork

Innovate

## Our Market Sectors

Take on the industry's most complex challenges and quality requirements to bring the products that matter to life.

### Industrial

Support a wide array of technologies that contribute to a smarter world. From robotics and energy to transportation controls and self-service kiosks, you will tackle a variety of challenges within the Industrial sector.

### Healthcare and Life Sciences

Be part of a team providing life changing and life saving solutions. Whether it's prevention, home care or monitoring and drug delivery, you will work through complex opportunities in an ever-evolving Healthcare and Life Sciences environment.

### Aerospace and Defense

Take immense pride in the products you help create within Aerospace and Defense. Through state-of-the-art engineering and manufacturing, your efforts support safe air travel, national and global security and mission-critical technologies.

Your journey begins here. Are you ready?

Join more than 19,000 innovative, dedicated employees across the globe and realize your goals while impacting the lives of others.
